

Leveling Agent HY1245

Component: Polyether modified polysiloxane

Instruction:

Special modified Polysiloxane. It is excellent organosilicone surfactant auxiliary which can supply good wetting property of bottom materials and anti-cratering property. It increases the smoothness of surface, scratch resistance and anti-adhesive property, improves leveling, gloss, and prevents Bernard swirl. Applied as additives in solvent-based, solvent-free based and water-based paint system.

Basic Character:

Item	Standard
Appearance	Colorless to amber transparent oily liquid
Non-volatile content	>97.0%
Refractive Index(25°C)	1.4300-1.4400
Viscosity(25°C)	200-500cs

Usage

It can be added as original form or pre-dilution form. Dosage: 0.05%-1.0%

Package

25L plastic drum, or 200L plastic drum/ metal pail

Transportation and Storage

Transportation as non-dangerous goods. Store in cool and ventilated warehouse. 12 months of storage period.
